

NCFI InsulStar® Residential Insulation Procedures for Warranty on InsulStar

NCFI Polyurethanes will provide InsulStar Insulation warranties for Residential applications when the following conditions are met:

1. NCFI InsulStar Insulation must be installed by a Gold Star certified applicator.
2. NCFI InsulStar Insulation must be the only insulation used in studwall applications.
One half inch or one inch thick flash coats of InsulStar with fiber or batts installed over it (“flash and batt”) in a studwall configuration does not qualify for a NCFI InsulStar warranty. This does not preclude the use of exterior insulating sheathing boards.
3. NCFI InsulStar may be used in conjunction with other types of insulation in ceiling, attic, or roof deck applications when pre-approved by NCFI. Contact NCFI with the details of the insulation plan prior to the application. This method of insulation will only be approved if the NCFI InsulStar is applied to a minimum thickness of three inches.
4. An NCFI InsulStar Warranty Application must be submitted within one week of application of the InsulStar insulation.
