Top Independent Spray Foam Insulation Information Website Chooses NCFI to Provide Product and “Best Practices” Knowledge

MOUNT AIRY, NC—Sprayfoam.com, the Internet's top destination for people and professionals searching for information and suppliers of spray foam insulation and foam roofing products, has chosen NCFI Polyurethanes to manage and moderate the site's new Frequently Asked Questions (FAQs) area.

“Homeowners, architects and building owners looking to cut monthly utility costs and improve building performance needed a place a way to find answers to their specific questions about spray foam,” says Doug Commette, general manager of Sprayfoam.com. “Our new FAQs area gives users a kind of online library, if you will, to research and locate all sorts of topics and categories that match their need, trade group, or particular interest as quickly, accurately and easily as possible.”

Commette explains, “NCFI is the ideal choice to provide information for these FAQs. Their brand recognition and experience in the spray foam industry is well known and respected. There is no doubt the industry, readers, and participants will all benefit from this alliance. ”

Nelson Clark, senior vice president of NCFI, says, “We’re honored Doug and Sprayfoam.com chose NCFI for our product knowledge, industry experience, and ‘best-practices’ expertise. We look forward to continuing our work of spreading the good news about spray foam insulation and making sure everyone in this industry has the best information available to do the best possible job.”
